THE BIGGEST LOLLIPOP IN THE WORLD

Barely inside the entrance to Fort Edmonton stands a yummy boutique of candies designed to satisfy even extreme gourmands. Managed with care and delicacy by Mme Archambault, the booth offers a vast choice of barley sugar, candies and fudges of all kinds. But the pride and joy of the stand is the enormous 85 lb lollipop majestically enthroned on top of the counter.

This round face with a joyous smile is made entirely of barley sugar. It seems to wish all at La Ronde a permanent Welcome!

On the other side of Mme Archambault's cash register are two magnificent canes each weighing 25 lbs. Also made of barley sugar, they are flavored with strawberry and menthol for those not satisfied with only one lollipop. More modest souls can regale themselves with other sugary delicacies and, of course, with regular-sized lollipops. A note to amateurs!
