CASE NO. III

This Chimpanzee Couch was used in the early Mercury program during the sub-orbital flights.

Ham, the first Chimpanzee to go into the Space Program, went up on January 31, 1961. His successful flight lasted about 15 minutes and set the stage for the first American astronaut to go into space. Chimpanzee Enos made a successful two-orbital Mercury trip on November 29, 1961.
