SKILCRAFT
Quality Blind-Made Products

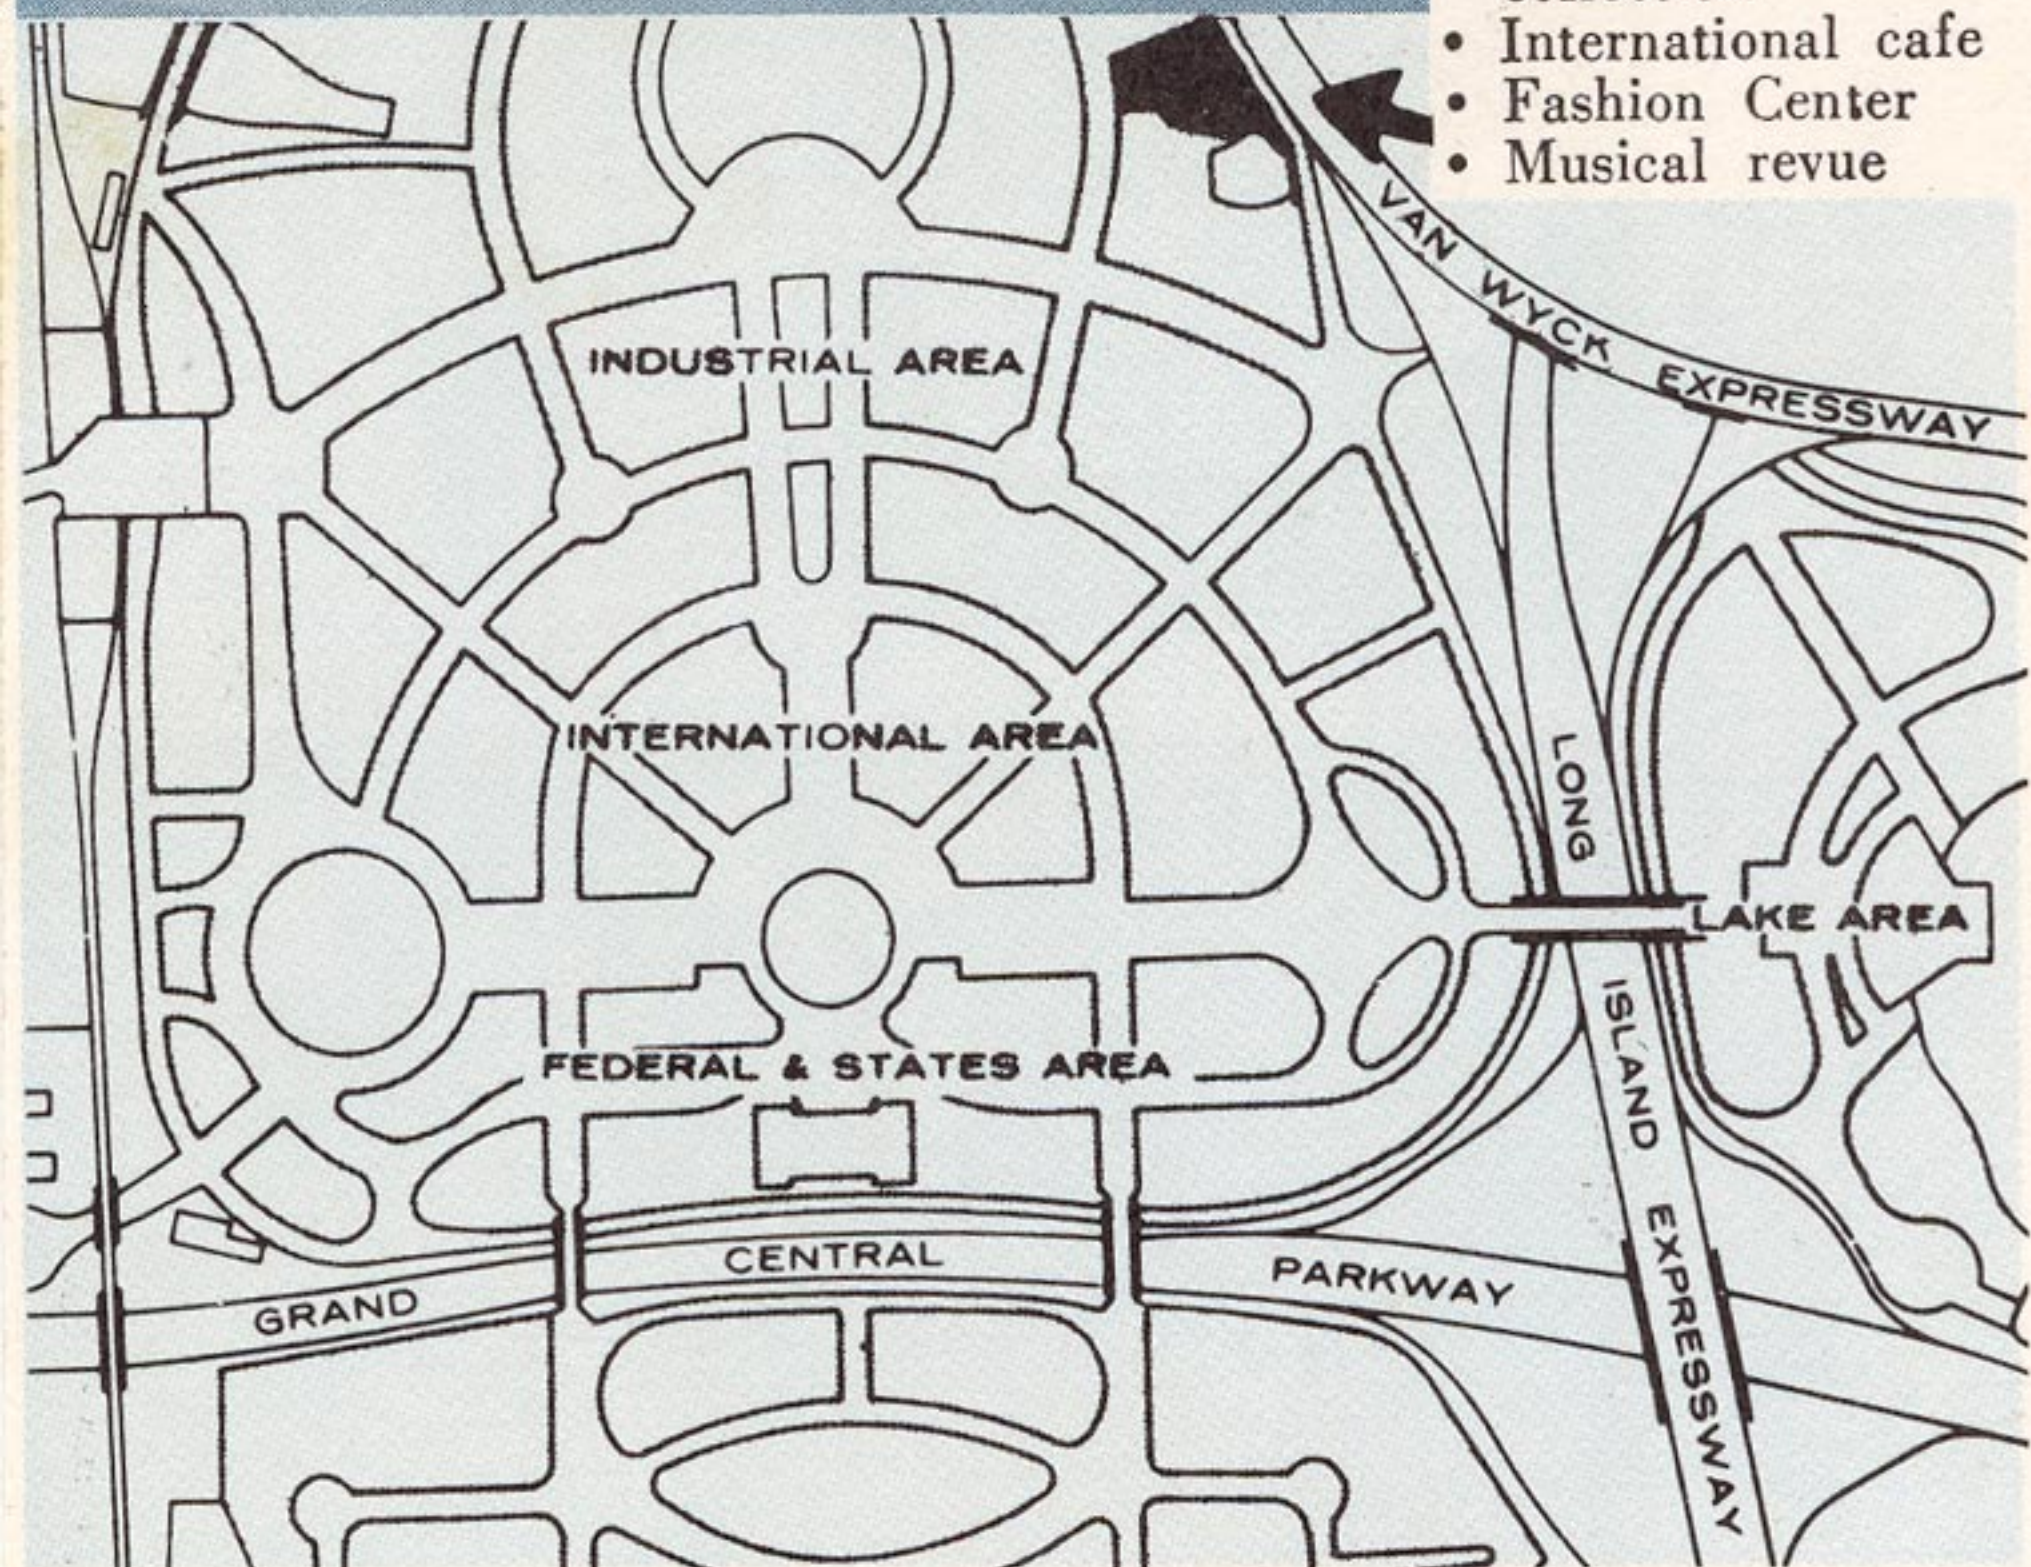

You won't want to miss this dramatic presentation of the blind man's role in American manufacturing. Blind workers will give on-the-spot demonstrations of the industrial skills which establish workshops as dependable sources of quality production. They are representative of the industrial workers employed in 65 workshops for the blind, in 34 states and the District of Columbia, associated with National Industries for the Blind in a national employment program.

BETTER LIVING CENTER

Featuring:

- NIB Exhibit
- Seven room dream home
- American art collection
- International cafe
- Fashion Center
